LANGUAGES

- Hungarian (native language)
- English (intermediate)

Due to my studies, I am mainly an informatic and economic-oriented person but I rather take an interest in IT and software development. I am currently in my 7th semester and I expect to graduate from university in May 2025.

I consider myself a productive and reliable person who always strives for the maximum both in a team and individually.

My goal is to find a job where I can devote my acquired skills and continue to expand my knowledge.
